

CLIENT GUIDE

Fitted and Co POS Client Guide

Introduction Usage and Workflow

Retail billing and stock control

Fitted & Co. POS connects the checkout counter with garment inventory, invoice history and store configuration. The workspace keeps product size, colour, price, GST and available stock visible during day-to-day billing.

The screenshot displays the 'Billing' workspace of the Fitted & Co. POS system. At the top, a navigation bar includes 'Fitted & Co. POS', 'Billing' (F2), 'Inventory' (F3), 'Sales & Reports' (F4), and 'Settings' (F6). Below this, a search bar prompts 'Search by product name or scan barcode... [F]'. The main area features a table with columns: #, PRODUCT, MRP (₹), QTY, % DISC, GST%, and TOTAL (₹). A single item is listed: 'Cotton Crew Neck T-Shirt' (CLT-MNS-M White 001) with an MRP of 349, a quantity of 1, 0% discount, 5% GST, and a total of ₹366.45. To the right, the 'CUSTOMER' field is set to 'Walk-in Customer'. The 'PAYMENT' section offers 'Cash' (selected), 'UPI', 'Card', and 'Credit'. A 'CART DISCOUNT' section shows options for 5%, 10%, 15%, and 20%, with a 'Custom value' field. The 'Subtotal (MRP)' is ₹349.00, and 'GST Tax' is ₹17.45. The 'GRAND TOTAL' is ₹366.45. At the bottom, buttons for 'COMPLETE SALE' (with 'Enter' key), 'PRINT BILL', and 'CLEAR' (with 'Esc' key) are visible. A status bar at the very bottom indicates '1 line item - 1 units'.

#	PRODUCT	MRP (₹)	QTY	% DISC	GST%	TOTAL (₹)

Billing workspace with a sample garment, payment choices, GST and the final total.

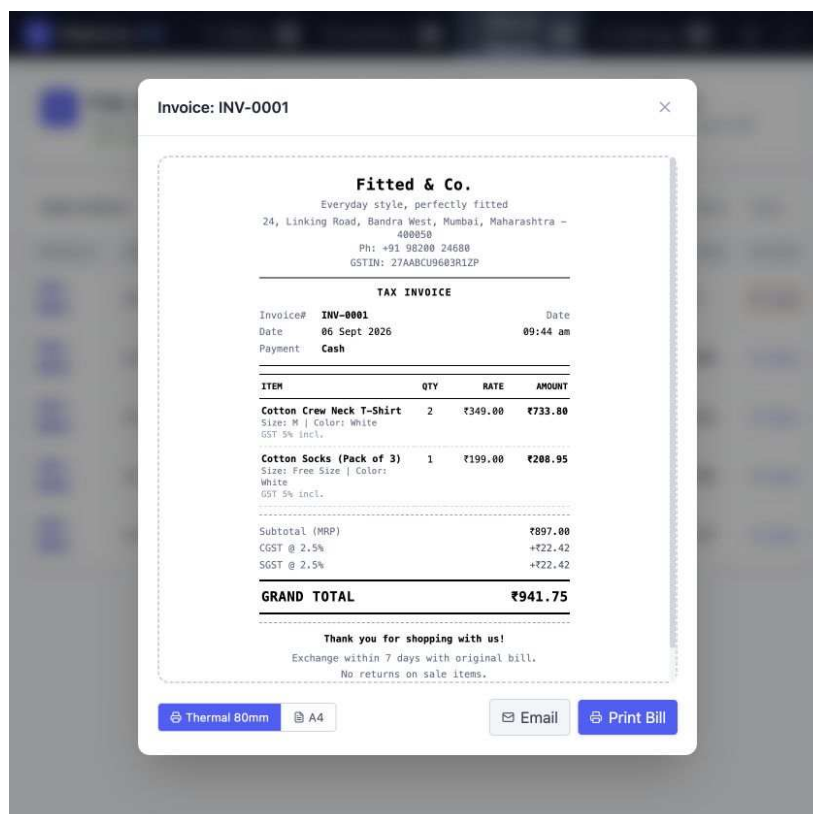

Main work areas

- Billing handles product search, cart quantities, discounts, payment and bill printing.
- Inventory tracks SKU details, category, brand, size, colour, pricing, GST and stock.
- Sales and Reports provides revenue summaries, sales history and invoice review.
- Settings controls shop identity, GST slabs and billing preferences.

Outcome. The operator can move from product selection to a tax invoice without leaving the POS workspace.

Create and complete a sale

- 1. Find the product** Search by product name or scan the SKU or barcode. F1 moves focus to search.
- 2. Review the cart** Confirm garment size, colour, MRP, quantity, item discount and GST before billing.
- 3. Add the customer** Keep Walk-in Customer or enter the customer name when required.
- 4. Choose payment** Select Cash, UPI, Card or Credit.
- 5. Apply a discount** Use a preset cart discount or enter a custom percentage or rupee value when permitted.
- 6. Finish the sale** Check the subtotal, GST and grand total, then complete the sale and print the bill.

Completed invoice view with line items, GST split, total and output options.

Bill output

- Print in Thermal 80mm or A4 format.
- Email the invoice or reopen it later from Sales History.
- Use Hold Cart when the customer needs to pause checkout, and Clear to abandon the current cart.

Inventory table with SKU, garment attributes, pricing, margin, GST and stock status.

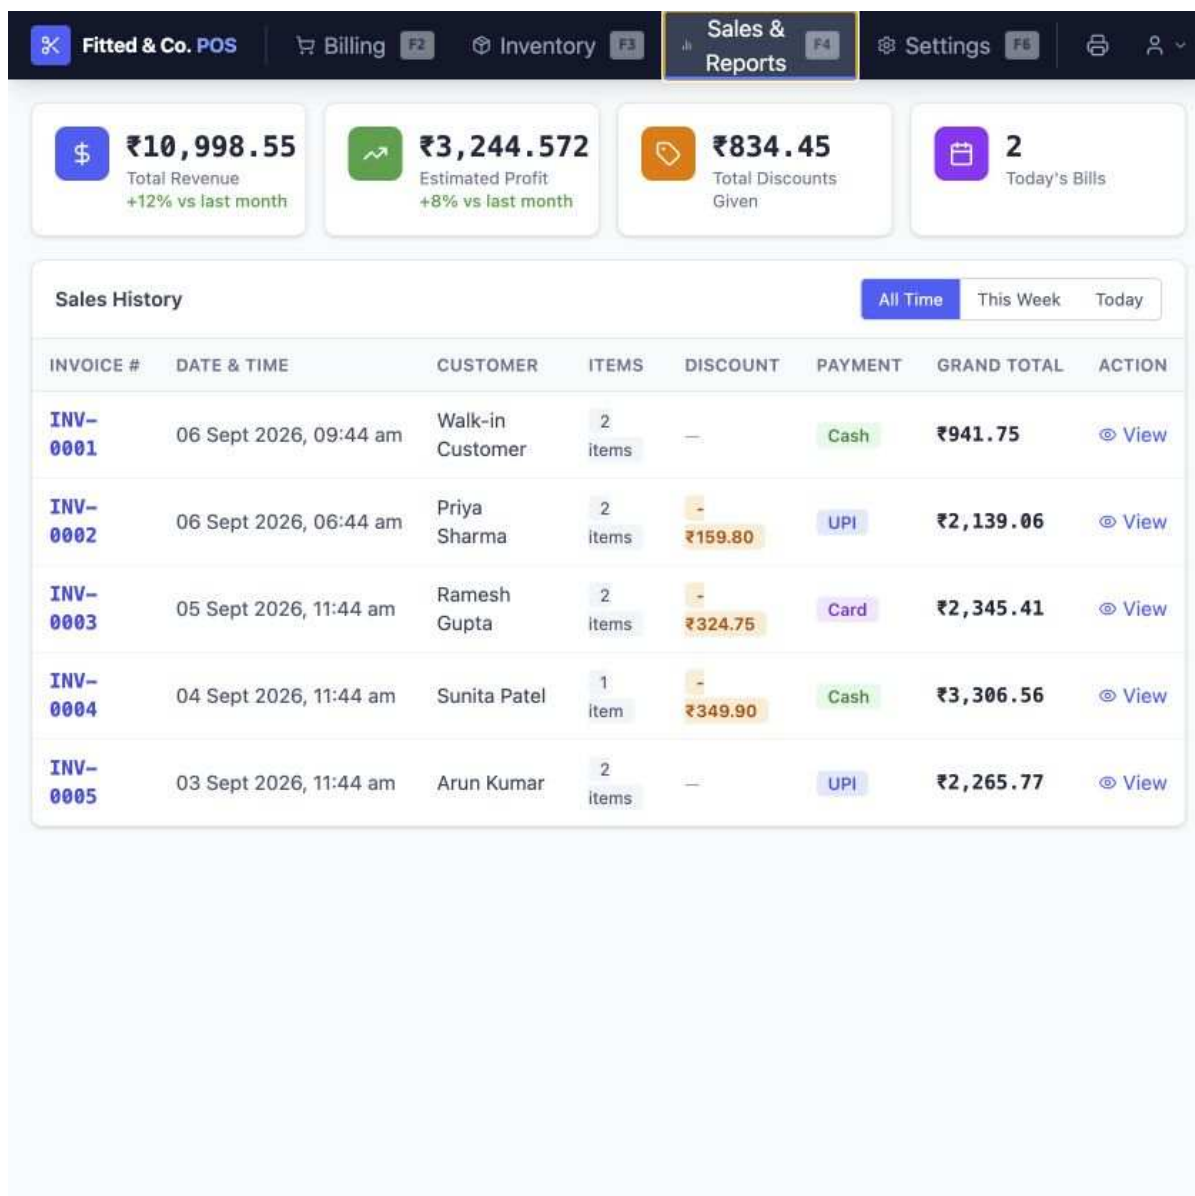

Daily inventory tasks

- Search products or filter by garment category.
- Switch between all items, low-stock items and out-of-stock items.
- Review MRP, cost, calculated margin and GST before editing a product.
- Add new products and maintain size and colour variants as separate SKUs.

Current demo view. The demonstration displays 27 SKUs across 5 categories, including 8 low-stock items and 1 out-of-stock item.

Outcome. Low-stock indicators help the store team identify replenishment needs before checkout is affected.

Sales reports and invoices

Sales summary and invoice history with payment, discount and total values.

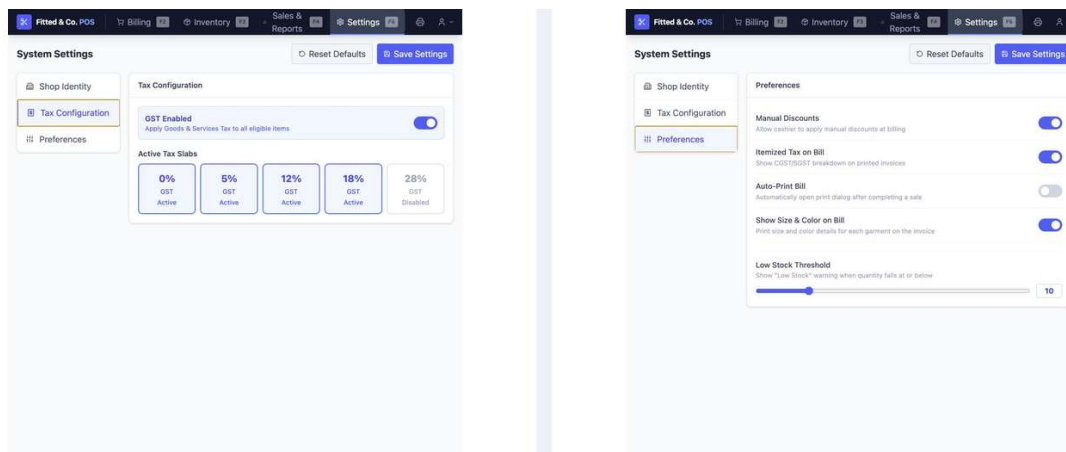

Review store performance

- See total revenue, estimated profit, discounts given and today's bill count.
- Filter sales history by All Time, This Week or Today.
- Review invoice number, date and time, customer, item count, discount, payment method and grand total.
- Open an invoice to print it again or send it by email.

Report values shown in this guide come from the prepared demonstration data and will change as demo transactions are added or reset.

Outcome. The client can trace a completed sale from the summary figures to its itemised invoice.

System settings and client walkthrough

GST configuration and billing preferences, including invoice detail and stock threshold controls.

Settings to explain

- Shop Identity stores the business name, tagline, address, phone, email and GSTIN used on invoices.
- Tax Configuration enables GST and selects active slabs.
- Preferences controls manual discounts, itemised tax, automatic printing, size and colour details, and the low-stock threshold.

Five minute client walkthrough

- 1. Billing** Search a sample SKU, add it to the cart and explain quantity, discounts, GST and payment choices.
- 2. Invoice** Open a prepared invoice and show Thermal 80mm, A4, email and print options.
- 3. Inventory** Point out garment variants, margins and low-stock filters.
- 4. Reports** Review summary figures, date filters and sales history.
- 5. Settings** Finish with shop identity, GST slabs and billing preferences.

Keyboard quick reference

Key	Action
F1	Focus product search
F2	Open Billing
F3	Open Inventory
F4	Open Sales and Reports
F5	Hold the current cart
F6	Open Settings
Enter	Complete the sale
Esc	Clear the current cart
