

Lex Flow

Legal Practice OS

Client Introduction & Workflow Guide

PRODUCT

LexFlow — Legal Practice OS

AUDIENCE

Law firms, advocates and legal operations teams

One calm workspace to move a matter from client intake to case tracking, court dates, tasks, documents, fees and controlled team access.

PRODUCT STORY One reference. One team view. One controlled workflow from intake through collection.

01 • PRODUCT OVERVIEW

What LexFlow brings together

LexFlow is a focused practice-management workspace for managing legal matters and the operational work around them. Each module is deliberately simple: add a record at the top, then review the structured register below.

CORE VALUE Less operational fragmentation. The team can see the same matter context, upcoming activity, assigned work, documents and financial position without jumping between separate trackers.

The matter lifecycle

1. Create the client — capture contact details and assign a reusable client number.
2. Open the matter — link the client, case number, court and responsible team member.
3. Schedule hearings — connect every court date and note to the correct matter.
4. Assign tasks — set priority, due date and ownership for follow-through.
5. Store documents — upload matter-linked PDFs into the secure document vault.
6. Track fees — record agreed value, billing, expenses and payments (Administrator).
7. Control access — manage users and roles as the practice grows (Administrator).

Who sees what

Role	Operational workspace	Administrative workspace
Administrator	Dashboard, Cases, Clients, Hearings, Tasks, Documents	Fees and Users
Staff	Dashboard, Cases, Clients, Hearings, Tasks, Documents	Hidden from navigation

02 • GETTING STARTED

Start from the Dashboard

The Dashboard is the daily control centre. It combines headline counts with the next hearing and priority work, so a user can orient themselves before opening a register.

Administrator view with active matters, hearings, tasks, documents and shortcuts.

Read the page in three passes

1. Check the four headline cards — active matters, upcoming hearings, open tasks and secure documents.
2. Review Next hearings — confirm the date, matter number, court and current status.
3. Review Priority tasks — confirm responsibility and whether urgent preparation is complete.

ROLE SWITCH Use the Administrator / Staff selector in the demo to explain permissions. In Staff mode, Fees and Users are removed from navigation; operational work remains available.

03 • WORKFLOW STEP 1

Create the client record

Begin with the Client directory. This gives the practice one clean identity for the person or organisation before matters are opened.

Quick add

CLIENT NAME	CLIENT NUMBER	EMAIL	PHONE	
				Add client

CLIENT	NUMBER	CONTACT	CREATED
Asha Sharma	CL-2026-001	asha@example.com +91 98765 43210	27/8/2026

Client directory with Quick add and the searchable-style client register.

How to use it

1. **Enter identity** — add the client name and a unique internal client number.
2. **Add contact details** — record the email address and phone number used by the practice.
3. **Save the client** — select Add client; the new record appears in the directory below.
4. **Reuse the record** — the saved client becomes available in the Client field when opening a matter.

RESULT A consistent client record is available for matter creation and future reference.

CLIENT DEMO TIP Use a simple numbering convention such as CL-YYYY-### so records remain easy to recognise.

04 • WORKFLOW STEP 2

Open and assign the matter

The Matter register is the core legal-work record. It connects the case identity, client, court and responsible staff member.

MATTER	CLIENT	COURT	ASSIGNED	STATUS
LF-2026-001 Sharma v. Meridian Industries	Asha Sharma	Delhi High Court	Aarav Mehta	IN PROGRESS

Matter register showing a Quick add form and an in-progress matter.

How to use it

1. **Name the matter** — use the familiar case title, for example Sharma v. Meridian Industries.
2. **Assign a case number** — enter the firm's reference, such as LF-2026-001.
3. **Connect the client** — select the client already created in the directory.
4. **Capture forum and ownership** — enter the court and select the assigned staff member.
5. **Open the matter** — select Open matter and confirm the record appears with the correct status.

RESULT The matter becomes the organising reference used by hearings, tasks, documents and fees.

CLIENT DEMO TIP For a compelling demo, point out how the same matter number appears across every later module.

05 • WORKFLOW STEP 3

Schedule the next hearing

Court dates stay connected to the matter, court details and a concise preparation note. This turns the hearing calendar into an operational trigger.

The screenshot displays the LexFlow 'Hearings' workspace. On the left is a dark sidebar with navigation links: Dashboard, Cases, Clients, **Hearings** (highlighted), Tasks, Documents, Fees, and Users. The main content area is titled 'Hearings' and includes a 'Quick add' form and a 'Court calendar' table.

Quick add form:

MATTER	DATE AND TIME	COURT	NOTES	
LF-2026-001	dd/mm/yyyy, --:--			Schedule

Court calendar table:

DATE	MATTER	COURT	NOTES	STATUS
28 Aug 2026, 11:38 pm	LF-2026-001	Delhi High Court - Court 12	Admission hearing	SCHEDULED

At the bottom of the sidebar, a 'Private workspace' note states: 'Documents are stored in protected object storage.'

Court calendar with matter, date/time, court and hearing notes.

How to use it

1. **Select the matter** — choose the correct case number from the Matter list.
2. **Set date and time** — enter the scheduled hearing date and start time.
3. **Specify the court** — include the court and courtroom or bench detail where useful.
4. **Add the purpose** — record a short note such as Admission hearing.
5. **Schedule** — select Schedule and confirm the status appears as SCHEDULED.

RESULT The hearing appears in the Court calendar and is surfaced on the Dashboard.

CLIENT DEMO TIP Keep hearing notes short and action-oriented; detailed legal strategy belongs in the matter documents.

06 • WORKFLOW STEP 4

Turn preparation into assigned tasks

Tasks make hearing and matter preparation visible. Each item can be linked to a matter, prioritised, dated and assigned to a team member.

The screenshot shows the LexFlow 'Tasks' interface. On the left is a dark sidebar with the LexFlow logo and a list of navigation items: Dashboard, Cases, Clients, Hearings, Tasks (highlighted), Documents, Fees, and Users. Below this is a 'Private workspace' note. The main area is titled 'Tasks' and includes a 'Quick add' form with fields for Task Title, Matter (dropdown), Priority (dropdown), Due Date, and Assignee (dropdown), followed by a 'Create task' button. Below the form is a table of tasks.

TASK	MATTER	ASSIGNEE	PRIORITY	STATUS	ACTION
Prepare hearing brief	LF-2026-001	Aarav Mehta	HIGH	DONE	Complete

Team task register with matter linkage, priority, assignee and completion status.

How to use it

1. **Write an action title** — start with a verb, for example Prepare hearing brief.
2. **Link the matter** — choose a matter number, or General for non-matter work.
3. **Set urgency and timing** — choose a priority and enter the due date.
4. **Assign ownership** — select the team member responsible for delivery.
5. **Create and complete** — select Create task; use Complete when the work is finished.

RESULT The team has a visible, accountable work item with a clear matter reference and status.

CLIENT DEMO TIP Demonstrate the chain: scheduled hearing → preparation task → completed work.

07 • WORKFLOW STEP 5

Store matter documents securely

The Secure document vault keeps PDFs tied to the correct matter and shows review availability and sharing state in one register.

Secure document vault with upload controls, review state and sharing action.

How to use it

1. **Choose the matter** — select the matter that owns the document.
2. **Give the document a clear title** — use a human-readable name that identifies its purpose.
3. **Choose the PDF** — select the file from the authorised location.
4. **Upload** — select Upload PDF and verify its filename, size and AVAILABLE review state.
5. **Share only when intended** — use the Share action according to the practice's access policy.

RESULT The PDF is stored against the matter with an explicit private/shared state.

CLIENT DEMO TIP The workspace states that documents are stored in protected object storage. Confirm production retention, backup and sharing policies during onboarding.

08 • WORKFLOW STEP 6

Track the financial position

The Administrator fee ledger keeps the matter's commercial position visible: agreed fee, received amount, balance, expenses and new payments.

LexFlow

LF-2026-001

	INR
Agreed	₹1,25,000
Received	₹25,000
Balance	₹1,00,000

Receipt no. Amount BANK_TRANSFER **Add payment**

Private workspace
Documents are stored in protected object storage.

Administrator fee ledger showing agreed, received and balance values in INR.

How to use it

1. **Select the matter** — open the ledger for the correct case number.
2. **Record commercial terms** — enter the agreed fee, billed value and expenses, then save the ledger.
3. **Review the balance** — confirm agreed, received and balance amounts before recording a payment.
4. **Add payment evidence** — enter a receipt number, amount and payment method.
5. **Save the payment** — select Add payment and verify the updated received and balance figures.

RESULT Administrators can monitor collections and outstanding matter value without exposing the ledger to Staff users.

CLIENT DEMO TIP Use receipt numbers consistently and reconcile this ledger with the firm's accounting source of truth.

09 • WORKFLOW STEP 7

Manage users and access

Practice access is managed from the Users module. Administrators can add people, assign a role and verify whether the account is active.

LexFlow
Legal practice OS

Users

Administrator Staff AD

Practice access

Quick add

FULL NAME EMAIL ROLE Add user

STAFF

USER	EMAIL	ROLE	STATUS
LexFlow Administrator	admin@lexflow.local	ADMIN	ACTIVE
Aarav Mehta	staff@lexflow.local	STAFF	ACTIVE

Private workspace
Documents are stored in protected object storage.

Administrator-only user register with role and account status.

How to use it

1. **Enter the user** — add the team member's full name and work email.
2. **Choose the role** — select STAFF for operational access or ADMIN for full administrative access.
3. **Add the user** — select Add user and confirm the account appears in the register.
4. **Verify status** — check that the account shows ACTIVE and that its role is correct.
5. **Review periodically** — remove or change access promptly when responsibilities change.

RESULT Each user has an explicit role and status, supporting controlled workspace access.

CLIENT DEMO TIP Apply least privilege: most users should be Staff; reserve Administrator access for authorised practice managers.
